

AFFIDAVIT

Comes now, the plaintiff, pro se, who will take oath at the jury trial to this statement under the penalties of perjury now and then and states that his statement is true and correct to the best of his knowledge. Plaintiff, states that exhibit-3, last underlined paragraph after prostate hypertrophy cancer states that plaintiff, have problem voiding problem which truly doesn't exist see exhibit-20 thru 22, clearly shows the date plaintiff, was released and change his address to 1698 Blount Rd. Pompano Beach, Fl, 33069, on Feb 9, 2006. Plaintiff, also wish to state that he have more peoples address who help Plaintiff, received prescription medication bill at a health facility for indigent people who also allow plaintiff, to stay two nights of Florida coldest nights, along with plaintiff, wearing a catheter 20 gauge see exhibit-4, on file, and that exhibit-20 thru 22 will verify the change date of address and if this Court request a copy of this change from this Court then this address change will verify from north Broward Detention Facility to 1698 Blount Rd. Pompano Beach, Fl, 33069, on Feb 9, 2006. See also exhibit-23, and that if this Court seek an order to the state of Florida medical office will verify the date plaintiff, was treated because they paid plaintiff, bill, plaintiff, further ~~states~~ states that the defendants can't get the entire state of Florida to lie for them, nor change their records, so therefore their treacherous scheme as far as attempting to sabotage plaintiff, civil action has also fail, and plaintiff, believe that this is what happen with these medical records. plaintiff, further states that exhibit-24, thru 31, it only further prove that plaintiff, team of doctors at baptist medical center is correct and they took the right steps to save plaintiff, life as to which no follow-up treatment was given from north Broward medical center and plaintiff, further states that Dr. Nichols, shouldn't even be allow to work on any human being. Plaintiff, doesn't have copies for defendants and requests that copies be of all exhibits be send to defense attorney and please added cost of copies to his filing fees.

CONSULTATION REPORT

FAMILY HISTORY: Noncontributory.

REVIEW OF SYSTEMS: Patient is denying headache. Denying problems with vision or hearing. Denying difficulty swallowing. No abdominal pain. No fevers. No joint pain. No recent weight gain or weight loss.

PHYSICAL EXAMINATION:

GENERAL: The patient is alert and oriented.

VITAL SIGNS: Blood pressure is 110/60, the pulse is 80 and regular, respiratory rate is 18.

EYE EXAM: Anicteric sclerae.

NOSE AND MOUTH EXAM: Within normal limits.

NECK EXAM: Normal carotid upstroke. Bruits are not heard. Jugular venous distention and hepatojugular reflux are not seen.

CARDIAC EXAM: The PMI is not felt. There is normal S1. The second heart sound is not appreciated. There is a grade 3/6 holosystolic murmur at the left sternal border that radiates to the axilla. Grade 2/6 diastolic murmur heard along the left sternal border. Grade 2/6 systolic ejection murmur at the left sternal border with radiation to the neck. Grade 2/6 holosystolic murmur at the right sternal border.

LUNGS: Clear.

ABDOMEN: Soft and nontender.

CONSULTATION REPORT

EXTREMITIES: No clubbing, cyanosis or edema.

IMPRESSION:

1. Supraventricular tachycardia/apparent paroxysmal atrial fibrillation.
2. Status post aortic valve replacement on 2 occasions with bioprosthetic valve.
3. History of schizophrenia.

PLAN:

1. Patient is admitted at this time to telemetry.
2. Patient has been known to be noncompliant in the past. I would not think Coumadin would be a good idea for this patient. Would consider aspirin.
3. Begin low-dose beta blockade therapy.
4. Echocardiogram will need to be done.
5. Further recommendations to follow.

HISTORY & PHYSICAL

CHEST: Equal in expansion, barrel shape. No retraction. Old midline sternal surgical scar healed.

LUNGS: Clear to auscultation.

CARDIAC: S1, S2 normal. Regular rate and rhythm. Borderline tachycardic. No thrill.

ABDOMEN: Normoactive bowel sounds. Soft, nontender, nondistended.

EXTREMITIES: No clubbing, cyanosis, or edema.

NEUROLOGIC: Patient alert and oriented x 3, coherent, able to get out of bed and sit in the chair without any problems.

LABORATORY DATA: CBC normal, except for hemoglobin of 12.7. Basic metabolic profile normal except for random blood sugar of 137. Baseline cardiac enzymes negative. Brain natriuretic peptide 439 which is slightly elevated. Liver function tests are normal, except for AST of 174, ALT 70. Lipase is normal. Ethanol high at 292.

Chest x-ray showed no acute pathology.

EKG showed sinus tachycardia, 104 beats per minute, left atrial enlargement and left ventricular hypertrophy by voltage and nonspecific ST-T wave changes.

IMPRESSION:

1. Atypical chest pain with shortness of breath and palpitations. Rule out myocardial infarction.
2. Transient atrial fibrillation, resolved spontaneously to sinus rhythm.
3. Alcohol and tobacco abuse.

 Dictated By:

North Broward Medical Center

ADMITTING DIAGNOSIS: Chest pain.

HISTORY OF PRESENT ILLNESS: A 53-year-old male with an established history of porcine aortic valve replacement for endocarditis, paranoid schizophrenia, alcohol and tobacco abuse with last intake of alcohol the night prior to admission. He presented to the North Broward Medical Center Emergency Room with a chief complaint of chest pain and shortness of breath.

ADMISSION ORDERS: The patient was admitted to the telemetry floor with the diagnosis of chest pain, ruling out myocardial infarction, and alcohol withdrawal. The patient was put on a cardiac diet. Medications ordered were aspirin, Cardura, Seroquel, Tylenol, thiamine, Librium and folic acid.

HOSPITAL COURSE: Consultation was carried out by Dr. Paris. His impression was a patient with supraventricular tachycardia, paroxysmal atrial fibrillation, status post aortic valve replacement on two occasions and history of schizophrenia. His plan - the patient was to be admitted to telemetry. The patient had been known to be noncompliant in the past. Begin low dose beta-blocker therapy, echocardiogram and further recommendations to follow.

North Broward Medical Center

REASON FOR CONSULTATION: CARDIOLOGY CONSULTATION.

HISTORY OF PRESENT ILLNESS: This patient is a 53-year-old gentleman with history of endocarditis in the past, apparent status post aortic valve replacement on 2 occasions, 1980 and 1993. He was given a bioprosthetic valve. History of schizophrenia and history of rapid heartbeat, the last occurring back he states in 1992. He came to the emergency room for evaluation of palpitations. Patient apparently was brought in by paramedics after being found weak and was given Adenocard with restoration of sinus rhythm. Strips show evidence of SVT which appears to be atrial fibrillation; however, he did revert to sinus rhythm with Adenocard. He has no prior history of myocardial infarction. No history of congestive heart failure. Patient denies paroxysmal nocturnal dyspnea, denies orthopnea, has had no complaints of peripheral edema. He has had no complaints of syncope.

CURRENT MEDICATIONS: Seroquel.

SOCIAL HISTORY: Patient smokes, drinks beer excessively.

ALLERGIES: NO KNOWN ALLERGIES.
